PERGO-LINE E210

ENJOY TIME ON THE TERRACE WHATEVER THE WEATHER

With its straight lines, cubic, modern design and full range of options and highlights, our new PERGO-LINE E210 in its cubic format has a box size of 210 x 186 mm and a total system width of 6 x 6 metres (4 x 7 metres available as an option).

All other benefits at a glance:

- flush closing-off for fallbar when awning is extended
- LED lighting in the spacer tube
- wall bracket with continuous inclination up to 25°
- several single systems can be linked together
- tried-and-tested counter-tensioning technology
- optional zip system (ZipRail)

Can also be extended as a row system

WALL MOUNTING

The new wall bracket allows the inclination to be continuously adjusted between 0° and 25°. Thanks to the innovative design, the inclination adjusts automatically to the required angle on installation. A wall connection profile, which can be integrated if desired, covers the gap between the façade and the awning.

NEW VERTICAL SUPPORT

The elegant yet robust vertical support and its completely overhauled foot boast increased stability and a consistent design. Covering caps for the fixing openings, recesses for the vertical awning guide tracks and integrated drainage openings are bound to impress, right down to the smallest detail.
